

- 15 -

5. A printer according to claim 3, further comprising:

a paper feed section which feeds a special paper sheet to the printing section; and

5 a sensor which senses absence of a special paper sheet in the paper feed section,

wherein when a printing job including special printing is selected by the user through the input section, the control section causes the display section
10 to display absence of the special paper sheet, on condition that the sensor senses absence of the special paper sheet in the paper feed section.

6. A print system comprising:

at least one terminal which receives data input
15 for printing and sends a printing job for executing the printing based on the input data; and

a printer which is networked to the terminal and executes the printing job sent from the terminal to print data,

20 said printer comprising:

a receiving section which receives printing jobs send from the terminal;

a storage section which stores the received printing jobs;

25 a printing section which executes the printing jobs extracted from the storage section;

a determining section which determines whether the

- 16 -

printing jobs received by the receiving section include special printing;

5 a display section which displays a list of the printing jobs that are determined as including special printing by the determining section;

an input section which accepts a printing job selected by a user from the displayed list; and

10 a control section which extracts from the storage section the printing job selected by the user, and causes the printing section to execute it.

7. A print system according to claim 6, wherein the control section extracts a printing job that does not include special printing from the storage section and causes the printing section to execute it.

15 8. A print system according to claim 6, wherein the special printing is printing on a special paper sheet other than a normal paper sheet.

9. A print system according to claim 8, wherein the special paper sheet is a tab paper sheet.

20 10. A print system according to claim 8, wherein said printer further comprises:

a paper feed section which feeds a special paper sheet to the printing section; and

25 a sensor which senses absence of a special paper sheet in the paper feed section,

wherein when a printing job including special printing is selected by the user through the input

section, the control section causes the display section to display absence of the special paper sheet, on condition that the sensor senses absence of the special paper sheet in the paper feed section.

- 5 11. A printing method comprising:
 receiving printing jobs;
 determining whether the received printing jobs
include special printing;
 executing the printing jobs that are determined as
10 not including special printing;
 displaying a list of the printing jobs that are
determined as including special printing without
executing them;
 accepting a printing job selected by a user from
15 the displayed list; and
 executing the printing job selected by the user.
12. A printing method according to claim 11,
wherein the special printing is printing on a special
paper sheet other than a normal paper sheet.
- 20 13. A printing method according to claim 12,
wherein the special paper sheet is a tab paper sheet.
